

media tower lockers

ALL UNITS ARE AVAILABLE

POWERED

NON-POWERED

OR

Installation

- A Remove packaging from lockers.
- B Remove keys from base of lockers.
- C Place locker in upright position in desired location.
- D Place correct keys in door locks and check locks work correctly.
- E Plug in to the mains via power socket found at rear of unit, kettle / IEC style the opposite end to be professionally wired to customers' electrical system by a qualified electrician.

Usage

- F Unlock each compartment front door using the lock.
- G Place power adaptor in compartment and plug into 3 pin socket.
- H Place Laptop* into compartment.
- I Connect the power adaptor into Laptop*
- J Ensure power adaptor is on the relevant side, so not to trap power cables.
- K Close and Lock door.

Note: if the units are with castors 2 have lockable wheels. Please lock when unit is in position by pushing down on the castor foot plate.

See Note (E) above for electrical connections
